Print out and have fun!

Fun with fractions!

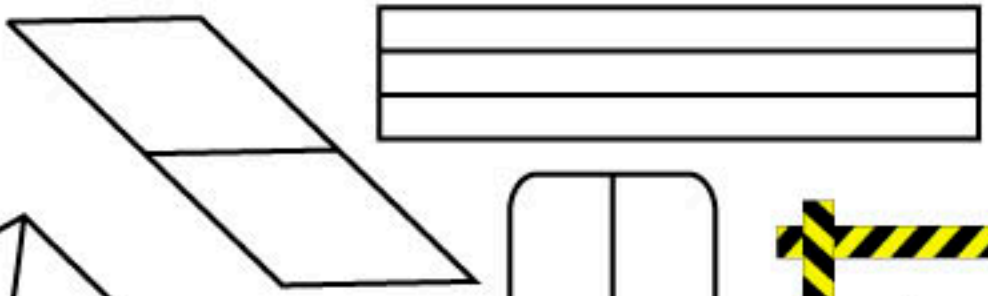
EXAMPLES:

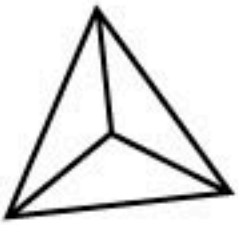
$\frac{1}{2}$

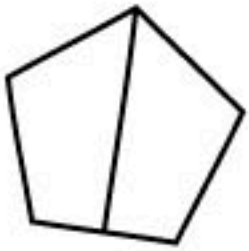
$\frac{1}{3}$

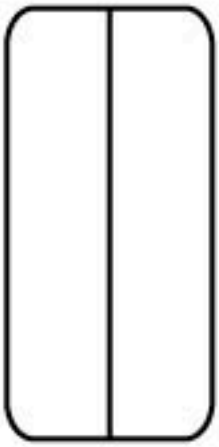
Look at the shapes below. Find the ones that are divided into equal sized parts. If a shape is divided into 2, colour one of the parts. This is called $\frac{1}{2}$

Do the same thing with the shapes that are divided into 3 equal parts, or one third. See the examples at the side. Count how many of each there are and write the answers in the space below.



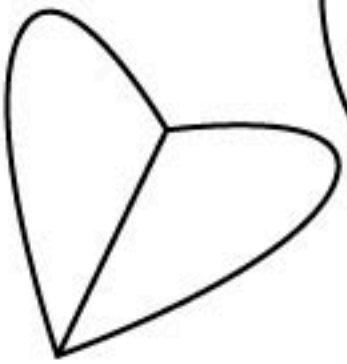


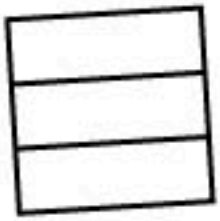


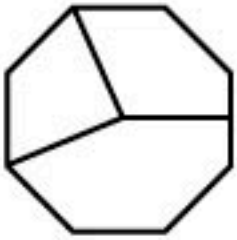


$\frac{1}{2} =$ ____

$\frac{1}{3} =$ ____







There are (5) shapes that are $\frac{1}{2}$.

There are (4) shapes that are $\frac{1}{3}$.

ANSWERS.

See you tomorrow for a new activity!
