

Print out and have fun!

Money counts

Figure out a different way of putting coins together to add up to the cost of the item for sale. One way is shown for you.

1 cent
(or a penny)

5 cents
(or a nickel)

10 cents
(or a dime)

25 cents
(or a quarter)

$$= 25¢ + 25¢ + 25¢ + 10¢ + 1¢ + 1¢ + 1¢ + 1¢$$

Wow!

or $25¢ + 25¢ + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

$$= 25¢ + 25¢ + 25¢ + 10¢ + 5¢ + 1¢ + 1¢$$

Nice job!

or $25¢ + 25¢ + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

$$= 25¢ + 25¢ + 25¢ + 5¢$$

You did it!

or $25¢ + 25¢ + \underline{\hspace{1cm}} + \underline{\hspace{1cm}} + \underline{\hspace{1cm}}$

See you tomorrow for a new activity!
